KEY QUALIFICATIONS

Education from natural sciences and sustainable development enabled me five years of work in the education sector and 16 productive years of successful work in nature protection through numerous national and international projects. Work experience as the assistant and then as the project manager within Nature protection program of the Association for nature, environment and sustainable development Sunce, through numerous national and international projects, resulted in a capacity related to protected areas. In the desire to increase

Curriculum Vitae

knowledge, I attended a range of informal education from various topics of nature protection (management planning and sustainable tourism in protected areas, monitoring of species, Natura 2000 ecological network, training, facilitation etc.) and thus focused on the field of interest - protection of nature and the development of sustainable tourism! With a professional career, I have been actively engaged in various outdoor sports for 25 years. As an alpinist of the Croatian Mountaineering Association, I participated in two Croatian female Himalayan expeditions "Cho Oyu 2007" and "Everest 2009" during which I climbed the "Roof of the world" - Mount Everest. Along with alpinism, other sports are also interesting, and I have been a member of the adventure racing team for few years. Fascination about the sea and its protection resulted in diving and my status as the CMAS Diver R **. The bicycle is one of my favourite ways of movement. 25 years of membership in the Mountaineering Association Mosor Split and 13 years of membership in Croatian Mountain Rescue Service complement my connection with nature and useful social work. Based on the acquired knowledge of experience and skills today I act as a consultant for nature protection and sustainable tourism with an emphasis on active tourism, and more precisely speaking, I work on:

- ✚ preparation of strategic documents (management plans, plans for sustainable tourism, action plans for visitor management)
- ✚ supporting in implementation of EU and other international projects described to nature protection and sustainable tourism
- ✚ capacity-building related to the planning of the management of the protected and Natura 2000 areas (workshops, lectures)
- ✚ strengthening the cooperation of local communities and public institutions (designing and facilitating workshops, study visits, lectures, presentations)
- ✚ inclusion in international networks and initiatives
- ✚ creation of educational-interpretative pathways
- ✚ education regarding sustainable tourism in natural areas (workshops, lectures)
- ✚ development of active tourism programs and itineraries
- ✚ designing and production of promotional materials (brochures, videos)
- ✚ biological monitoring of Euroasian river otter (*Lutra lutra L.*)
- ✚ biological monitoring of *Posidonia oceanica* meadows.
- ✚ active tourism guiding
